## Concrete Garden Accessories

---

The stone and marble work generally used in the formal gardens of Italy, France, etc. has proved not to be well adapted to our varying, rigorous climate.

In the improved form of concrete a most durable material has been evolved for the manufacture of our Concrete Garden Accessories.

Garden Benches, Tables, Urns, Pedestals for Sun Dials and Gazing Globes, Bird Baths, Fountains, Vases, etc. all built on classical lines and are unaffected by weather conditions.

Their soft, gray color blends beautifully with the deep green of the foliage and adds a touch of distinction to the garden.

They can also be used with excellent effect for the decoration of entrances, halls, piazzas and windows. We describe only a few of the many designs we can furnish.

Specimens are exhibited at the office grounds of the New England Nurseries Co., Bedford, Mass. and examination is respectfully solicited.

---
